- 25X1 1/ Comment. These are mainly breathing filters for gas masks produced by VEB Pharmazeutisches Werk Oranienburg.
- 2/ Comment. Mainly xanthocillin.
- 3/ Comment. The following is the reason for the sharp decline in planned 1954 and 1955 production for pure morphine, as compared with planned and actual 1953 production: in 1953 pure morphine was produced mainly for export and for stocking in the State (later Operational) Reserve. There is actually little demand for pure morphine in East Germany. The Operational Reserve is now stocked with pure morphine for an estimated ten years.
- 25X1 4. Comment: Reported as received. Probably dozens of cans or jars is meant.
